

# Air Quality Project

Colombia University (USA) vs University of Abomey-Calavi (Bénin)

2

## Why this project is interesting for us

3

## Context

- Air Pollution has become a global issue
  - Invisible but its consequences are dramatic and very harmful (health)
  - Mainly consequence of human activities (transport, household, agriculture, Industry)
- These consequences are probably in Benin but unrevealed
  - Unknown situation but some activities are indicators that our air quality shouldn't be clean

4

## Context

## 5 Expectations/Goals

- Collect Air Quality Data and Analyze it (find insights to improve our daily-life)
- Improve the sensor (connection problem, temperature issues, com
- Undertake real projects to improve daily-life in Benin (being able to impact our country)
- Exchange students in the way to reinforced our capacity here
